

43.33 N 7.016 E

We dive for the experience. From the planning and anticipation, to setting foot on the boat, to the first breath, to the beauty and discovery of the deep blue. It's an experience we never stop thinking about. It's our passion. It's why we were the first to create diving equipment over sixty years ago. And it's why we continue to be the world's leading designer and manufacturer of dive gear - with unmatched innovation driven by the passion and love of diving.

VENTURE

HOW FAR WILL THE DIVE TAKE YOU?

Our top performer. With simplified adjustments, the Legend regulator series incorporates a proprietary over-balanced diaphragm first stage design, coupled with a high performance balanced second stage. The over-balanced first stage achieves unprecedented performance by compensating for the denser air at depth. The balanced adjustable second stage reduces breathing resistance to near zero with a lightweight balanced valve seat designed to respond instantaneously to the slightest inhalation. The Legend regulator series is the best performing regulator Aqua Lung has ever offered.

LEGEND

Designed for use under the most extreme conditions, the Legend Glacia offers greater resistance to freezing than any regulator Aqua Lung has ever produced. In addition, it boasts a breathing performance that is equivalent to that of a Legend Supreme.

LEGEND GLACIA

LEGEND LX

The Legend LX is our top of the line fully adjustable regulator complete with an Auto Closure Device (ACD) feature that seals the inlet fitting as soon as the regulator is removed from the cylinder valve.

- Environmental dry chamber creates a first stage that is completely sealed, keeping water and contaminants out of the regulator's first stage
- Pneumatically balanced second stage makes this a superior breather at all depths and conditions
- User adjustment knob allows you to be in full control of breathing effort by adjusting for currents, depth or even surface swimming

LEGEND OCTOPUS

MIKRON

Travel light. Pack performance. The smallest and lightest weight regulator on the market today.

- Weighs in at just 26 oz. (DIN) and 31 oz. (yoke) for light-weight travel packing
- Performance is not sacrificed by the regulator's extreme compactness
- Balanced first and second stages produce exceptional breathing performance
- Compact size also makes the Mikron ideal for women and young adults

MIKRON OCTOPUS

Designed with the photographer in mind, Kronos offers innovative solutions to common frustrations found with traditional regulators. The asymmetric Side-X exhaust system gets the bubbles out of your field of view, while fine-tuning is simplified by combining the venturi control with the breathing resistance knob into one Dual Cam controller.

KRONOS

NEW FOR '09

The redesigned Titan LX offers proven performance at a great price.

- Auto Closure Device (ACD) keeps corrosive water out of the first stage
- Light, compact first stage
- Pneumatically balanced second stage for high performance

TITAN LX

This affordable regulator features a balanced diaphragm first stage that is equipped with the "Air Turbo System," an additional channel built into the first stage designed to boost the breathing performance of the regulator. The Titan series uses a standard yoke connector and an optional DIN adapter is available as an accessory.

TITAN

DEPARTURE

LET'S LEAVE THE LAND BEHIND

PRO QDi3

Top-of-the-line and with the latest technology, the Pro QD i3™ will change the way you dive forever. Its innovative design includes a one-touch lever that helps you simply and safely control your buoyancy.

- Upper and lower Flat E-Valves™ keep the BC streamlined while offering effective and responsive air dumping
- SureLock™ mechanical weight release system (patented) offers unsurpassed ease of loading, ditching and security of weight pouches

Intuitive

The i3 is simple and intuitive. Move the lever up to inflate or down to deflate your jacket.

Convenient

The i3 inflator is always stationary — at the same location where your left hand normally rests.

Reliable

The i3 does not utilize pneumatics or hydraulics to activate the Flat E-Valve™, so there is no possibility of leak failure.

BLACK DIAMOND

Our technical do-it-all back inflation BC is designed for the serious diver. This rugged BC will take you over the edge while providing comfort for daily diving.

- Constructed of rugged 840 denier nylon
- 5 large stainless steel D-ring attachment points (4 on size small)
- Vertical adjustment chest strap to compensate for drysuit valves

Experience the unrestricted freedom of back inflation with the Balance BC.

- Revolutionary triangular load distribution system in the shoulder strap, offering exceptional comfort both underwater and on land
- Rear bladder with patented harness system for exceptional support and load distribution
- Also available in Libra – designed specifically for women

BALANCE

TECHNOLOGY THAT WORKS

PRO QD

Our highly acclaimed best seller. This full featured mid-range BC continues our tradition of quality and innovation, with an attention to detail that makes it the choice of serious divers.

- SureLock™ integrated weight system
- Swivel buckle system for unsurpassed fit
- Outer bladder construction of Armorshield™ Cordura® for increased wear and fade resistance

Affordable ADV jacket-style BC perfect for the occasional diver. Features like SureLock™, fade resistance and Armorshield™ Cordura® maintain our high quality standards.

- Easy-to-use integrated Octo-Pocket (patent pending)
- Optional lower right pull dump

LATITUDE XLT

NEW FOR 09

PEARL

Our new mid-level women's BC for real divers. The Pearl offers an adjustable waist band and a wide adjusting shoulder strap that allows you to fine-tune the fit to your body. It incorporates a plush back lining and Aqua Lung's customary sports bra for added comfort and stability.

- Features the new patented SureLock™II mechanical weight release system
- Hybrid air cell combining the best features of a jacket style and a back inflation unit
- Sleek, low profile lobes with scalloped lower edges to rise above the hips
- Flat E-Valves™ reduce drag and keep the BC streamlined with one-way valves designed to keep water out

Exclusive SureLock™II

Our innovative mechanical weight release system just got better. Simple, safe, secure.

Airsource 3

Combines a high performance second stage with a power inflator, eliminating the need for a traditional octopus.

FREE

MICROMASK

The Micromask is a revolution in mask design. Its innovative structure allows the lenses to fit seamlessly into your field of vision, while its patented cardanic double joint buckles rotate both up-and-down and in-and-out to provide maximum adaptability and comfort.

Never before have lenses been so close to the eyes, which not only results in an amazingly wide peripheral view but an extremely low internal volume. This makes it one of the most popular masks among both scuba and free divers.

This 4-window close-to-the-eye frame design produces a mask with a low profile and an excellent view upwards and downwards.

- Side lens is made of an optical quality polymer and offers brighter vision
- Cardanic joint buckles (double joint buckles) rotate both up-and-down and in-and-out to provide maximum adaptability and comfort for any head shape
- Quick counterposed push button activation is easy to adjust straps even when wearing gloves

INFINITY

See the world clearly with the new Look 2 mask.

- Easy pop-and-swap optical lens system
- Available in two sizes for a custom fit
- Great visibility

NEW FOR 09

LOOK 2

With lenses that are positioned at an incline, this mask provides a wide angle of view upwards and downwards to make for an incredible field of vision.

- Cardanic joint buckles (double joint buckles) rotate both up-and-down and in-and-out to provide maximum adaptability and comfort for any head shape
- New strap with larger headpiece provides greater stability and comfort

FAVOLA

EQUIPPED

EXPLORE WITH CONFIDENCE

A no thrills mask, but great for snorkeling and scuba.

- Angled lens and low volume design for great visibility
- Silicone skirt fits a variety of face shapes

MYTHOS

This solid, robust mask was created with technical divers in mind.

- Outer frame made of shock absorbent techno-polymer
- Folds down flat to fit into BC pockets

TEKNIKA

The reference in snorkel design.

- Innovative two-valve system
- Upper annular valve directs most of the water out before it even reaches the mouthpiece
- Patented and replacable Comfo-Bite™ mouthpieces eliminate jaw fatigue

IMPULSE 3

SLINGSHOT

WELCOME TO THE MOVEMENT

Introducing the fin of the future. The innovative Slingshot has been engineered for effortless power and speed with unmatched comfort.

Mid-Foot Flex Joint

Transfers the power from your entire leg to the blade relieving pressure from your toes and ankles

Power Bands

Releases energy with each stroke, adding power and momentum to your kick with less effort

Three-Speed Gear Shift

Customizes your speed-to-effort ratio to fit your specific dive conditions

Our classic full foot fin is excellent for snorkeling and scuba in warm water where booties are not needed.

- Combination of polymer plastic for stability and rubber for flexibility
- Produces maximum thrust and lateral stability

STRATOS

Cost-conscious lightweight full-foot pocket fin that packs a lot of power. Made from thermoplastic material and provides extraordinary elasticity.

CARAVELLE

The adjustable version is an excellent entry level and all around fin.

- Flexible, lightweight blade provides an easy kick with ample power
- Anatomically shaped foot pockets enhance comfort and performance
- Extended heel pocket for additional support and power transmission

CARAVELLE ADJ

BLADES 2 FLEX

This time-proven blade design features a unique blend of materials for increased flexibility and performance.

- Anatomically shaped foot pocket enhances comfort and performance
- Extended heel pocket for additional support and power transmission

SOLAFX

Our most advanced cold water suit will help you defeat any cold without sacrificing flexibility or comfort.

Across-the-chest zipper and hood-attached design keeps cold water out.

Made entirely from 4-way stretch Aqua Flex 8mm and 7mm neoprene for fluid warmth and comfort.

Vent G2 technology allows regulator exhaust to exit while keeping cold water out.

VENT G2 TECHNOLOGY

These suits were developed for bodies in motion. With the flexibility and comfort of our 250% 4-way stretch Aqua Flex neoprene, you can be free to move. It's about comfort. It's about stretch. It's about you.

- Aqua Flex 7mm, 5mm, 3mm 4-way high stretch neoprene with ultra stretch wrist and ankles
- New stretchable and segmented kneepads
- Skin-in neck seal provides comfortable stretch and seals out water
- Comfo-panel and spine pad ensure fluid comfort
- Kidney pad adds insulation in key heat loss areas (7mm only)

AQUA FLEX 7mm, 5mm, 3mm

NEW FOR 09

NEW FOR 09

Perfect for the tropical diver.

- 1mm ultra flexible neoprene throughout
- Ultra stretch wrist and ankles
- Pre-bent anatomic legs with flexible kneepads
- Skin-in neck seal keeps out water
- Heavy duty back zipper with water shield

1mm

NEW FOR 09

Flexibility and comfort makes this shorty the best for recreational dives.

- 2mm neoprene
- Skin-out torso
- Skin-in neck seal with Comfo-panel
- Heavy duty back zipper with water shield

2mm SHORTY

Remember the fun not the burn.

- 50+ UPF (SPF) rating
- Lycra blend of 80% nylon / 20% spandex
- All available in long or short sleeve

RASHGUARDS

DISCOVER

SOMETHING DEEPER

Aqua Lung's Barrier boot with low profile molded outsole provides excellent protection while maintaining feel.

- Flexible rubber laminate guards against abrasion from foot pockets and fin straps
- Pull-on entry minimizes water exchange for maximum warmth
- Thermal FLEX 4-way stretch neoprene allows easy entry and improves comfort
- Packaged in drawstring mesh bag

BARRIER

This 2mm neoprene glove with padded poly suede palm is an excellent combination of warmth and flexibility.

- Silicone tactiles on finger tips and palm provide excellent grip
- Adjustable hook and loop wrist closure

VERACRUZ

This flexible boot has rubber laminate that guards against abrasion from foot pockets and fin straps.

- Low profile molded outsole provides excellent protection with maximum feel
- 3mm low cut upper is ideal for warm water diving
- Molded entry pull and built-in strap retainer

CAICOS

Thermal FLEX 4-way stretch neoprene panels provide exceptional comfort and warmth.

- Bell cut wrist opening allows for trouble-free entry and accommodates wetsuit cuffs comfortably
- Silicone tactiles on the palm provide excellent grip when wet
- Available in 3mm and 5mm

ALEUTIAN

An ergonomically designed glove that has pre-curved fingers that help minimize hand fatigue.

- Available in 3mm or 5mm standard neoprene
- Rubberized coating on palm for durability and added grip
- Adjustable cinch closure at wrist for a secure fit

THERMOCLINE

This big and durable backpack is built for comfort and convenience.

- 1680 denier ballistic nylon with heavy duty rubber coated mesh
- Padded straps, adjustable sternum strap and soft foam spine and back pad
- Full length zipper for easy access with heavy-duty vinyl bottom and drain grommets

OCEAN PACK

Perfect for those warm water get-aways.

- 1680 denier ballistic nylon
- Large molded fin pockets with drainage and internal wet/dry compartment
- Heavy-duty #10 YKK tooth zippers and stainless steel zipper sliders
- Padded backpack straps with adjustable sternum strap

TROPICAL BAG

WTX SERIES

Apeks, the company that produces the premiere line of technical regulators, offers you a premiere line of technical BCs. Presenting the WTX Series — a selection of harnesses, buoyancy cells and accessories that will certainly appeal to today's technical divers. These products offer unparalleled versatility through their modularity. The components can be assembled into a highly technical rig for those trained to push the limits, or scaled down to make a travel friendly rig that any diver would want to use.

Each product has been carefully designed by the Apeks engineering team in conjunction with some of the most accomplished technical divers of our time. Each component has undergone extensive field-testing to make sure the design is right the first time. All materials and components are selected for strength and durability. The result is a product selection that technical divers can be confident in.

The flagship of the Apeks fleet of fine regulators

- The over-balancing feature allows the medium pressure air in the hose to increase faster than ambient pressure resulting in superior performance
- Comes standard with an environmental dry kit, which keeps water and contaminants out as well as makes the model more resistant to freezing
- Pneumatically balanced second stage has diver-adjustable controls for opening effort and venturi control
- Suitable for cold water use

XTX200 SERIES

For the diver who wants the benefit of a feature-rich regulator at a moderate price.

- Four medium-pressure ports all mounted on a rotating turret resulting in optimal hose routing while eliminating sharp bends in the hose
- Over-balanced first stage resulting in higher medium pressure at each depth, creating a very responsive, easy breathing regulator
- Offers a ratcheting venturi control lever and easy-to-grip opening effort control knob

XTX50 SERIES

TEK3 regulators are designed to be used on twin cylinder set-ups. Utilizing dedicated right and left hand first stages, hoses are able to route downward, creating a more streamlined configuration and minimizing entanglement hazards in overhead environments.

- TEK3 utilizes all of the proven technology contained within the Apeks range of first stage regulators
- Allows maximum unrestricted accessibility to the cylinder valves when using a twin cylinder set-up
- Outstanding cold water performance

DESIGNED FOR WOMEN

PEARL i3

Our best women's BC ever features an all-new air cell powered by our revolutionary i3 technology, combining a jacket style design with a back inflation unit. A patented sports bra provides added comfort and stability.

Integrated i3 Controller
Simple, single touch control for both inflation and deflation.
see page 12 for details

Octo-Pocket
Convenient Octo storage located on both sides of the jacket.

Flat E-Valves™
Sleek design helps to reduce drag and keep your BC streamlined.

Three Large Pockets
Includes a large pull down, allowing you to stow your accessories securely

www.aqualung.com/pink

Pack your own. Compact dimensions and low weight blend makes the Mikron an ideal choice for women.

- A new braided hose weighing less than 5 oz. provides flexibility, comfort and excellent packability
- Available with a new, smaller Comfo-Bite™ mouthpiece designed for smaller mouths
- New Pink/Vanilla color matches the new Pearl i3 BC

MIKRON

NEW FOR 09

Amazingly wide peripheral view mask.

- Extra low volume makes it very easy to clear
- Patented cardanic double joint buckles rotate up-and-down and in-and-out to adapt to any head shape
- Push button activation makes the buckle easy to adjust straps, even when wearing gloves

MICROMASK

The Aqua Flex stretch neoprene wetsuit, available in short and long lengths, is the perfect fit to the female form.

- New, stretchable, segmented kneepad
- Skin-in neck seal provides comfortable stretch and seals out water
- Comfo-neck panel and spine pad ensures fluid comfort

WOMEN'S WETSUIT

Now in its 3rd generation, the Impulse remains the reference in snorkel design.

- Innovative two-valve system
- Reservoir located below the mouthpiece to keep breathing path clear of excess water
- Patented and replaceable Comfo-Bite™ mouthpieces eliminate jaw fatigue

IMPULSE 3

THE OCTO-POCKET

PROVEN SINCE DAY ONE

Circa 1958

FIRST TO DIVE

Since 1943, when we invented the first Aqualung underwater breathing apparatus, we have been committed to the adventure and exploration of diving. For 2009, we continue this legacy of innovation, bringing you some of the most technically advanced and reliable equipment available.

We invest in the latest manufacturing technology to assure the highest quality and finish.

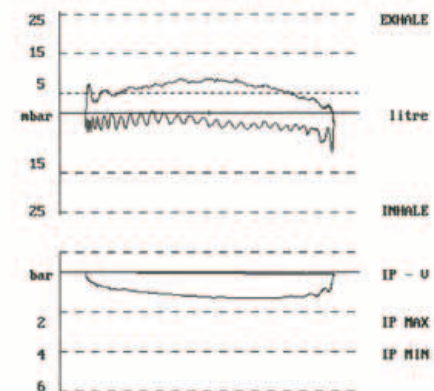

Our precision machine measures every first stage to ± 0.00002 inch (1/2 micron) to guarantee exceptional performance.

UNRELENTING QUALITY

Aqua Lung's is one of the few vertically integrated equipment manufacturers. This hands-on approach allows us to oversee every step of every piece of equipment we make — from research and development to sourcing, testing and manufacturing. At the same time, our equipment has been constantly proven in the real world, from recreational divers who have used the same regulator for the last 20 years to navy, military and search and rescue teams who specify Aqua Lung equipment for critical missions around the world.

Each regulator is tested repeatedly to ensure the best breathing technology possible.

PROFESSIONAL SERVICE

Aqua Lung products are available through long established authorized retailers around the world who can provide you with the highest quality advice, service and equipment for your diving adventure.

ADVANCED TESTING

Aqua Lung is one of the few companies to have a test pool and ANSTI breathing machine (allows us to simulate underwater breathing in any extreme dive temperature and depth) on-site in all of our regulator manufacturing facilities. This means we can thoroughly test every regulator we produce and actively refine the performance of our equipment.

Our ANSTI machine allows us to simulate underwater breathing at extreme temperatures and depths and refine performance.

LEADING CERTIFICATION

Specific Aqua Lung facilities are ISO certified to ensure quality and our Apeks facility in Manchester, UK has received ISO 14001 environmental certification, making us the first diving company in the world with this accreditation that ensures an environmentally friendly manufacturing process and product.

2009 WETSUITS

SIZES 9.0

2009 TECHNICAL	 TX200	 TX50	 TEK 3
Over-balanced diaphragm design increases interstage pressure for superior performance	●	●	●
Pneumatically balanced second stage provides outstanding inhalation	●	●	●
Environmentally sealed dry chamber helps resist freezing and keeps the internal mechanism clean & dry	●	●	●
Second stage left/right reversibility	●	●	●
Inhalation adjustment feature permits diver to control breathing gas delivery under a variety of diving conditions	●	●	●
Interchangeable exhaust trees	●	●	●
Diver-controlled integrated Venturi Switch (IVS) reduces sensitivity to free flow on the surface and provides maximum airflow at depth	●	●	●
Exclusive Comfo-Bite™ mouth-piece virtually eliminates jaw fatigue	●	●	●
# of medium pressure ports	4	4	4
All medium pressure ports located on a rotating swivel turret		●	
# of high pressure ports	2	2	1
300 bar DIN connector available	●	●	ONLY
Nitrox compatible up to 40%, new, out of the box	●	●	●
Passes the stringent European Standards for cold-water performance	●	●	●
Built-in second stage heat exchanger	●	●	●
Limited lifetime warranty	●	●	●
Free parts replacement program	●	●	●

The Apeks WTX technical series is made up of a collection of harnesses, buoyancy cells and accessories that appeal to today's technical divers. These fine products offer maximum versatility through their modularity. Do you want a backplate? Do you want weight-integration? Do you want twin cylinders? Which hardware do you want on the shoulders? You decide. While each component can be highly customized, they still fit together to form a rugged system that is up to your demands.

THE JOURNEY

Aqua Lung equipment has been used worldwide, for more than five decades at every level of diving. From the Navy Seals to professional divers to recreational adventurers - Aqua Lung is the first name in diving for reliability and performance.

“

I am always a little afraid of cave diving but knowing that I have the best gear on my back gives me one less thing to worry about. After years of professional diving Apeks has taken me to places no diver has ever been and brought me back safely.

DR. STEFANIE SCHWABE, Geomicrobiologist

I surf Pipeline in the world's harshest conditions where equipment has to be precise. When I dive the same reefs I go with the worlds best Scuba gear, Aqua Lung, you should too.

JAMIE O'BRIEN, Pro Surfer

I started my dive career with Aqua Lung and have relied on them ever since. I used the same Aqua Lung regulator on my first dive in the Atlantic, my first dive to the Andrea Doria and my first dive to the U-869. I still have it today!

DAN CROWELL, Diving Pioneer

 30 DAY SATISFACTION POLICY

Buy with confidence. If your Aqua Lung product falls short of your expectations, simply return it to your authorized Aqua Lung Dealer within 30 days with the original receipt to exchange it for another Aqua Lung product. At participating dealers only.

 The vehicle was provided by Chrysler France which represent Chrysler, Jeep® and Dodge brands.
